Instructions:
Print & cut cards. Shuffle your cards. Each player is dealt 5 cards. The goal is to get matches of four of a kind (or two of a kind for younger kids). The cards I created have four colors (red, orange, yellow and green) to match the colored Goldfish crackers. They also have numbers 1-3 for each color and then there are 6 Wild cards included in the deck to make it more interesting. The Wild cards can be used in place of any color or number of card.

Each player gets a small bowl of Goldfish crackers in color to use along with the game. As they collect matches they also have to match up the correct number and color of crackers to the cards.

You can ask any other player on your turn for a card to match what you have in your hand. When they give it to you, they also give you the matching Goldfish crackers. If the player you ask does not have the card you needed, they say “Catch a Number”, and you get to draw a card from the deck.

Lay down any matches on the table along with the matching crackers. At the end of your turn you can draw cards to return your hand to 5 cards if needed. When cards run out, the player with the most matches is the winner of the game!
Use in place of any card.
